Analog Communications

UNIT-I :

① Introduction to Communication System :

The Main Objective of a communication System is to transmit an information signal from a source located at one point to a destination located at another point with a minimum distortion and noise so that to produce to accurate o/p at the receiver end.

Any Electronic communication System can be represented in its basic form,

Information Source :-

The communication Systems communicates message. The message comes from the information sources. it may contain human voice, picture, code, data and their combinations.

Transmitter : The transmitter is a collection of electronic circuits designed to convert the information into a signal suitable for information transmission over a given communication medium. most of the times message that comes from information source is non-electrical and therefore it is not suitable for immediate transmission.
